Wide format graphics are an innate part of modern cityscapes and interior design elements. The urban environmental impact on these images, however, can weaken their cause: a strong message carried by strong colour images.

Mara® Jet DI-FMS scores with brilliance while It is designed to be the most operator friendly ink.

Beyond qualitative requirements like colour compatibility and high resistance, product safety is equally important for the user.

Mara® Jet DI-FMS masters this challenge and delivers everything a todays signmaker needs.

Mara® Jet DI-FMS was specifically developed for Mimaki® printers operating in SS21 Ink configuration and other machines employing Epson® printheads DX5,6, or 7 heads.

The Mara® Jet DI-FMS substrate range includes:

- different qualities of PVC self-adhesive foils (monomeric, polymeric and cast PVC films)
- other PVC coated materials and tarpaulins
- textiles, suitable papers

Characteristics	Mara® Jet DI-FMS
Plug & Print compatibility	+++
